

Lyte™ 3000

A PRACTICAL STEP TOWARDS MORE SUSTAINABLE PACKAGING.

Lyte™ 3000 is an expanded polystyrene resin containing 30% total mechanical recycled content. Our recycled resin solutions are engineered to optimize performance and deliver the consistency required for demanding packaging applications.

MINIMUM 30% TOTAL RECYCLED CONTENT

Lyte™ 3000 Product Benefits

**30% Total Recycled
Polystyrene Content**

**Recycled-Content
Blend**

**Dependable
Performance**

**UL 2809
Validated**

The mix of post-consumer and pre-consumer recycled material may vary by production batch.

Applications

Protective Packaging

Ideal for wine shippers, pharmaceutical shippers and other non-food-contact protective packaging applications.

Independently Verified

Lyte™ 3000's recycled content is independently validated under UL 2809, providing assurance that the recycled content claim has been evaluated by a third party.

MADE IN THE USA

Domestic production supports a dependable supply chain while reducing exposure to import tariffs.

VALIDATED

• LYTE 3000 CONTAINS A
MINIMUM OF 30% RECYCLED
CONTENT.
