

Lyte™ 5000

High Performance. Lower Environmental Impact.

Lyte™ 5000 is an expanded polystyrene resin containing 50% post-consumer recycled content. It delivers performance comparable to virgin resin while helping customers incorporate more recycled material into their packaging applications.

VALIDATED

LYTE 5000 CONTAINS A
MINIMUM OF 90%
POST-CONSUMER RECYCLED
CONTENT.
UL.COM/ECV

MINIMUM 90% RECYCLED CONTENT
POST CONSUMER

Lyte™ 5000's recycled content is independently verified under UL 2809 and certified by SCS Global Services, providing added confidence in the product's recycled-content claim.

Lower-Impact Materials

Epsilyte's recycled-content EPS reduces reliance on virgin materials and demonstrates a lower global warming potential than standard EPS.
